

Laneway Commissions 2010

INFORMATION SHEET

For Option 1: Lingham Lane/ Projector Site

Location: Lingham Lane
off Flinders Lane between Swanston
and Elizabeth streets (Melway 1BL9)

The City of Melbourne is seeking submissions for site-specific screen based content that may be innovative, experimental and in development.

Technical Equipment in situ

Two projectors:

- OPTOMA EX525ST – ultra short throw projector
- 2500 Lumen
- 1024 x 768 XGA - max resolution
- Maximum projected image size – approximate – 4.1m x 3.1m
- Ceiling mounted in protective housing
- Inputs: VGA, DVI, S video, video.

Please note: These projectors DO NOT have HDMI input

Two MAC Mini computers:

- Compatible for: QuickTime (.mov), Flash (.fla)
- Macs can be set to auto start through internal time clock.
- Files to be played should be included in computer start up menu, as projectors will power up on receiving signal.

Please note: These projectors will not auto start any other way.

General information:

- All devices are currently mounted five meters from the ground (within protective housing).
- Power to projectors is paired, as is power to computers. Each paired power source has its own dedicated timer circuit.
- Timer access is at ground level.
- There is no audio available at the site.
- There is a hotel with rooms above the lane, so consideration must be given to operating times.
- Two car parks are accessed via this lane, and access to these should be available at all times.
