

BLACK HARMONIES

Black Harmonies CD Project is a musical partnership bringing together inspiring Aboriginal and African Australian artists to create this exciting and vibrant new soundtrack. The artists have shared their musical talents and strengths to create innovative and exciting Australian contemporary music. Each individual artist has contributed an original song and recorded it with support from other artists. The project is a collaboration fusing the commonality of what we as black people go through. In essence our songs and stories are similar and we have come together to share, to listen and to sing. It has been inspired by the Black Harmony Gathering held annually in Melbourne, Australia. A very special thanks to the Koori Justice Unit for their support in bringing us all together for Black Harmonies.
